

Greater Cleveland Regional Transit Authority
Citizens' Advisory Board

VAC

Agenda for Friday, March 2, 8:30 a.m.

For each agenda item, we should identify next steps and assign carrying out those steps to a willing participant. Sometimes, of course, "wait and see" will be the next step.

Introduction of visitors

Discussion of proposed website upgrades: This would be an discussion of the improvements proposed at last month's meeting, with discussion of related subjects added in.

- Meeting information: Should we stagger meeting times to accommodate the varying schedules of people who may be interested in attending meetings, and/or should we consider other approaches to making our deliberations more accessible? Should we change the form of VAC agendas and meetings?
- Presentations link: Would this be a repository for all presentations put forward by RTA in a given time, or would the link focus on certain categories of presentations?
- Fleet information
- Mobile web accessibility: This would obviously be a long-term project. What steps should we take now to promote it?

State-related transit issues: How can we effectively address these issues?

- Ability of municipalities to exit transit systems
- State funding of transit

Tracking the transit-promotion policies of other organizations

Tracking service and facility complaints
