

Greater Cleveland Regional Transit Authority

SUMMARY OF PROPOSED AWARD HAZARDOUS & NON-HAZARDOUS WASTE SERVICES

Presented to: Organizational, Services &
Performance Monitoring Committee

July 16, 2019

Project Overview

Hazardous & Non-Hazardous Waste Services

- Federal Code Requirements found In 40 CFR 261-265.
- State Requirements found in Ohio Administrative Code, OAC 3745.

Project Overview

Hazardous & Non-Hazardous Waste Services

Code and good Environmental Stewardship require generators of hazardous waste streams to manage the waste from “cradle to grave”.

Project Overview

Hazardous & Non-Hazardous Waste Services

The contract will continue to ensure that licensed professionals:

- Apply the correct labeling to the containers.
- Inspect containers. Repackage if necessary.
- Safely transport the waste.
- Store and dispose of the waste.
- Provide manifests and documentation that meets or exceeds requirements to protect GCRTA.

Project Overview

Hazardous & Non-Hazardous Waste Services

Examples of Waste Streams:

- Waste solvents from painting operations.
- Sludge from bus washing operations.
- Solids and semi-solids from oil water separators.
- Mercury containing fluorescent light bulbs.
- Nickel cadmium, lead acid, and lithium batteries.

Project Overview

Hazardous & Non-Hazardous Waste Services

The contractor also performs analytical testing to determine disposal methods. Examples include:

- Lead Content
- Corrosivity
- Flammability
- Toxicity
- Reactivity

Project Overview

Hazardous & Non-Hazardous Waste Services

The contractor also acts as an emergency services provider for all spills that may occur on or off GCRTA property that we are responsible for.
