

# Proposed Clarification of Service Availability Standard

Presentation to  
Operational Planning & Infrastructure Committee  
RTA Board of Trustees  
July 17, 2018

# Our Current Service Availability Standard

- Adopted in March 2018 after review with this Committee
- Submitted to FTA to fulfill a Title VI requirement
- FTA staff requested more clarification
- Staff discussed with FTA staff adding two sentences for clarification
- FTA staff replied that the proposed language would satisfy the FTA request

# Proposed Clarifications

- Only Sections C and E need clarification (see italics below).
- C. Ideally, 365-day bus or rapid transit service should be located near every Cuyahoga County resident. *Rapid transit service includes rail and bus rapid transit service.*
- D. Resource limitations ... preclude realization of the ideal.
- E. The Authority will provide 365-day public transit service within  $\frac{3}{4}$  mile of at least 60% of county residents. *Public transit service is any transit service open to the general public, including bus, rail, and bus rapid transit service.*

## Next Steps

- Receive comments from Board members today
- Build final language into resolution for consideration by the RTA Board at its July 24 meeting

# Questions?

Greater Cleveland Regional Transit Authority
