Contractor Owned and Serviced Parts Wash Tanks

Project Overview

Parts Wash Tank Service

Sustainability-Recycling Process

- The contractor collects the used solvent and processes it through a fractional distillation column.
- The solvent evaporates and is collected.
- Solids remain in the bottom of the column.

Project Overview

Parts Wash Tank Service

Sustainability-Recycling Process

- The evaporated gas cools and returns to a liquid which is free from contaminants
- The solids are collected and disposed of by combining the material into a fuel used for cement kilns

Procurement Overview

Parts Wash Tank Service

- RFP issued July 23, 2018
- Accessed on the GCRTA website by 7 interested parties
- Two firms proposed
- Two firms interviewed
