2012 Budget Guide

Organization of the Adopted Budget Plan

The purpose of this section is to describe the contents of the 2012 Operating and Capital Budgets (Adopted Budget Plan) for the Greater Cleveland Regional Transit Authority. This section is an aid for those who wish to analyze the book in detail. The Tables of Contents in the beginning of the book and on the tabs in the beginning of each section provide further direction to the reader.

Transmittal Letter

The Transmittal Letter is an overview of the Authority's operations and finances for the upcoming fiscal year. It includes the CEO/General Manager's Letter, summaries and revenues, expenditures and staffing, service indicators, and a profile of the service area.

Budget Guide

In addition to providing an outline of the Adopted Budget Plan, the Budget Guide explains the Authority's financial and budgetary policies, including the rationale for their adoption and the manner in which they are implemented and monitored. The Budget Guide also contains a description of the budget management process, a budget calendar, and glossary of terms used in the Adopted Budget Plan.

Fund Budgets

The Fund Budgets section defines the Authority's fund structure and the interrelationships between funds. Individual fund statements reflect the trends in revenues, expenditures, ending balances, and transfers between funds over a six-year period. Historical, current, and prospective information is provided. An analysis of the Authority's financial condition is based on these trends.

Department Budgets

The Department Budgets present the Adopted Budget Plan by organizational unit. These sections describe the six divisions, their mission, functions, achievements for the past year, and priorities for the current year. Individual budgets, budget implementation narratives, organizational charts, and staffing level summaries are provided for each department.

Capital Improvement Plan

The Capital Improvement Plan itemizes capital projects approved for 2012 and those planned for 2013 through 2016. This section discusses funding sources, debt limits, capital improvement planning cycle, and the criteria used to establish priorities.
Financial Policies

Introduction

The Authority adopted a set of financial policies in 1989, relating to its overall finances and to particular funds. The policies were amended in July 1998 to include four additional key indicators.

These policies were then amended again in September 2011 to provide a comprehensive framework for the management of revenues and financial resources of the Authority. They provide guidelines for decision-making by the Board of Trustees and management on how the financial resources of the Authority shall be used to achieve the Authority’s mission and provide public transportation services.

The new policy objectives are a better indicator of efficiency, effectiveness, and financial condition of the Authority, which ensures the fiscal integrity of the Authority and adherence to laws and regulations. The Authority’s purpose, which is to provide a public service, will only be accomplished so long as it remains a financially viable organization. In this vein, a balance of using the funds to provide that service and maintaining a reserve for possible future shortfalls must occur. The new policy objectives to measure and/or control expenses and revenues are:

- Operating Ratio at or above 25%
- Operating Reserve at least 1 month
- Growth in Cost per Service Hour at or below the rate of inflation
- Debt Service Coverage
- Sales & Use Tax Revenue (between 10% and 15%) allocated to Capital Improvement on an annual basis
- Capital Maintenance Outlay to Capital Expansion will be a minimum of 75% to a maximum of 90%.

In addition to the elimination of two policy objectives, RTA established reserve funding. The volatility of fuel prices and the impact of the Great Recession of 2008-2009 have shown that establishing reserves to help offset the impact of future significant financial disruptions would be especially valuable and prudent. As such, the new policies authorize:

- Operating Reserves
  - Reserve for Fuel
  - Reserve for Compensated Absences
  - Reserve for Hospitalization

For accounting purposes, the Authority reports the results of its operations in a single enterprise fund, the All Funds Statement. However, for budget purposes, a separate budget must be adopted annually for each fund (see Fund Budgets section). Therefore, the following financial and budgetary policies are organized by Fund, except for those general policies that are applicable to the Authority as a whole.
ALL FUNDS

Policy Statement: Current appropriations in each fund are limited to the sum of available cash, encumbered balances, and revenues estimated to be received in the current budget period.

Rationale: By law, the budget must be balanced and expenditures cannot exceed available resources. A balanced budget occurs when total expenditures equal total revenues. The budget is also balanced in situations where total expenditures are less than total revenues, called a surplus. A third type of a balanced budget is when total resources (previous year balance plus current year revenues) are greater than total expenditures.

Balanced Budget:
A) Total Revenues = Total Expenditures
B) Total Revenues > Total Expenditures
C) Total Resources > Total Expenditures

Implementation: The Board of Trustees (BOT) has adopted other policy goals that go beyond the statutory requirement listed above and requires certain reserves in each fund. The specific requirements are discussed under the appropriate fund policy statement. The following describes the implementation of this policy for the General Fund.

In the General Fund, estimated resources total $286.7 million: current revenues of $255.4 million plus an estimated beginning balance of $31.3 million. Total estimated expenditures for 2012 equal $266.2 million and are within the estimate of total resources available. The ending balance, $20.5 million, meets the one-month reserve recommended by the Trustees for the General Fund (see page BG-6). The Board policy goal is considerably more restrictive and more determinate than the legal demand for balanced appropriations.

Policy Statement: The Authority’s interim funds shall be invested to achieve the maximum financial return consistent with prudent market and credit risks while conforming to applicable State and Federal laws and consistent with the cash flow requirements of the Authority, matching maturities and/or marketability at par, to meet outstanding obligations and financial commitments.

Rationale: With interim funds of more than $50 million, investment income is a material resource for the Authority and makes funds management a priority. Investment decisions should attempt to increase yields without risking the principal or the liquidity position of the organization. In addition, idle cash balances should be invested whenever possible to maximize investment income.
2012 Budget Guide

Implementation: The Ohio Depository Act and the Authority’s cash management investment policy allow the Authority to invest in the following types of financial instruments:

- U.S. Government securities, maximum term of three years
- Secured certificates of deposit, maximum term of one year
- U.S. Government Agency securities, maximum term of three years
- Repurchase agreements of U.S. Government and Agency securities, maximum term of thirty days
- State Treasury Asset Reserve of Ohio (STAR Ohio), daily liquidity

Monthly reports summarizing investment transactions and earnings are provided to the Board of Trustees. The Authority was able to achieve a favorable return on its 2011 investments and at the same time meet its outstanding financial commitments with an investment yield of 0.50%.

Policy Statement: The Authority’s personnel, procurement, and other policies are designed and administered to obtain the maximum value for the funds provided by its constituents.

Rationale: As a public agency, the Authority delivers the services for which its taxpayers and users provide resources. The incentive is not to generate an excessive surplus of funds, but rather, to provide the most extensive and cost-effective level and mix of services possible. When services and operations are well managed and costs are contained, the Authority can provide greater services.

Implementation: In the General Fund, the growth in the cost of providing services (measured by cost per hour of service) must remain at or below the rate of inflation. This policy goal allows the Authority to maximize the use of its resources and provide the most direct service possible.

Budgeted 2012 General Fund operating expenditures, which exclude transfers to other funds, are $230.9 million, which represent an increase of nearly $15.5 million, or 7.2%, over estimated 2011 levels. The largest Operating Budget appropriation, $169.6 million, is for Personnel Services, which accounts for 73.5% of the total operating appropriation. The 2012 appropriation for personnel costs is 6.8% higher than the 2011 estimated level. This increase is due, in part, to the restoration of the 3% wage reduction of non-bargaining personnel, an annualized 1.75% wage increase for non-bargaining personnel and FOP employees (received in 2011), and a budgeted 3% wage increase for non-bargaining personnel and FOP employees (to be received in 2012), which was tied to Sales Tax and Passenger Fare revenues received in 2011. These increases include labor and fringe benefits. Other increases include diesel fuel, liability costs, and ADA purchased transportation.

In the Capital Improvement Fund, economies are sought that minimize the costs of capital projects. Construction management activities ensure the timely completion of these projects at the lowest cost. Cost savings also are possible by planning for the purchase of similar types of equipment in larger quantities. Additionally, capital investment is encouraged where operating cost savings and operational efficiencies result.
Policy Statement: Program demands require that an adequate resource stream be maintained. The Authority must make the hard decisions required to assure a continued flow of resources.

Rationale: It is the policy of this Authority to take whatever steps are necessary to ensure full and continued funding for the services, programs, and facilities, which the Authority is required or elects to provide. The Authority should actively pursue whatever legitimate revenues it can locate to support the services its constituents demand.

Implementation: Cuyahoga County experienced an historic decline in Sales & Use Tax receipts in 2009. For the Authority, Sales Tax declined 10.94%, losing nearly $19 million in Sales Tax revenue. During 2010, Sales Tax receipts increased $9 million from 2009 levels due to the additional tax on managed health care. The Sales Tax was not expected to return to the 2008 levels until 2015. The Authority planned on a new base level of revenue at a reduced amount.

In 2008, Governor Strickland led the way for temporary emergency funding for Ohio Transit Agencies with balances held in Metropolitan Planning Organizations (MPOs). As a result, the Northeast Ohio Area Coordinating Agency (NOACA), our regional MPO, made $9.0 million available to RTA to lessen the impact of fuel cost increases from 2008 to 2009. The Authority used $7.3 million of those funds in 2009 and the remaining $1.7 million was utilized in 2010. Two grants for Congestion Mitigation and Air Quality (CMAQ) for costs associated with the HealthLine and Trolley operations were authorized for use in 2009 and 2010, respectively. $1.9 million of the HealthLine funding was used in 2009, $1.7 million in 2010 and the remainder in 2011. The CMAQ funds for Trolley operations are split between 2010, $1.76 million, and 2011, $0.98 million.

Policy Statement: An operating reserve in an amount equal to at least one month’s operating expenses shall be budgeted each year to cover unforeseen or extraordinary fluctuations in revenues or expenses.

Rationale: Adequate reserves must be maintained to avoid disruptions in service due to temporary shortages in operating funds or fluctuations in revenue streams or costs.

Implementation: This policy was met in 2010, the first time since 1990, at 1.2, and was met again in 2011, at 1.8. The reduction in expenditures over the past two years has helped this financial policy to be achieved. This policy goal is expected to be met again in 2012, at 1.1.

Policy Statement: Growth in the cost of delivering a unit of service (cost per service hour) shall be kept at or below the rate of inflation.

Rationale: As a means of measuring cost containment, direct costs should not be permitted to increase faster than overall price levels.
2012 Budget Guide

Implementation: This policy goal has not been met in the past three years because service cuts were decreasing more rapidly than operating expenses. The comparable growth in the cost per hour of service in 2011 is 4.5%, slightly higher than the projected inflation rate and considerably lower than the rate in 2009, at 9.1%. For 2012, operating expenditures are budgeted to increase by 7.2% in 2012 due to wage increases for FOP and non-bargaining employees, service added, diesel fuel costs, and an increase in ADA purchased transportation. Service hours are budgeted to increase by 5.8%, compared to 2011 and service miles are budgeted to increase by 7.4%, compared to 2011. This policy goal is expected to be met in 2012, at 1.0%, and again in 2013 and 2014 at 0.6% each.

Policy Statement: The Operating Ratio (Operating Revenues divided by Operating Expenses) shall not be allowed to go below 25% with a long-range objective of having Operating Revenues cover an increasing portion of Operating Expenses.

Rationale: A higher Operating Ratio indicates that the Authority is becoming more self-supporting and less reliant on other sources of income. Additionally, a lower Operating Ratio indicates that customers are paying a lower portion of the operating cost of providing the service.

Implementation: Operating Revenues include passenger fares, advertising, concessions, and interest income. Operating Expenses include all expenditures of the General Fund less transfers to other funds, which are charged to and reimbursed by the Capital Program.

The ratio increased in 2010 to 23.8%, although still below the 25% goal, primarily due to the decrease in operating expenses due to the service reduction and implementation of the fuel-hedging program. In 2011, the ratio is projected to take a slight downturn to 23.3% due to projected increases in labor, diesel fuel, and inventory materials. For 2012, operating revenues are expected to account for 22.2% of total operating expenses. The Operating Ratio is expected to stabilize in 2013 and 2014.

Policy Statement: Debt service coverage (total operating revenue minus operating expenditures divided by debt service requirements) shall be kept to a minimum of 1.5.

Rationale: The Authority should comfortably support Debt service payments. The excess from general obligations should be used as the measure to not jeopardize the financial condition of the Authority.

Implementation: The debt service coverage measure has traditionally been met and the minimum significantly exceeded since the Authority has used debt sparingly.

The debt service coverage was met in 2010 at 2.05 and again in 2011 at 2.57 due to a decrease in operating expenses. Debt service is expected to decrease in 2012 to 1.99 and again in 2013 and 2014 at 1.57 and 1.15, respectively.

If actual operating costs for 2012 remain steady, this goal will continue to be reached. The use of debt service to help fund the Capital needs of the Authority must be carefully controlled so that it will not impact the future operating needs.
CAPITAL IMPROVEMENT FUNDS

Policy Statement: An amount between 10% and 15% of Sales & Use Tax revenues shall be allocated to the Capital Improvement Fund on an annual basis. This allocation shall be used to support budgeted projects in the Capital Improvement Fund or support debt service payments in the Bond Retirement Fund.

Rationale: Capital assets such as facilities, equipment, and vehicles, are essential to the provision of transportation services. Although expensive to sustain, a regular capital investment program lowers operating and capital costs over the long term. The Federal Government funds a substantial portion of capital projects, but the Authority must have adequate local matching funds on hand in order to qualify for FTA grants. State and Federal assistance has shrunk in recent years, leaving the Authority to absorb an increasing share of capital expenditures through 100% local funds.

Implementation: The Authority has combined debt financing and direct allocations of Sales Tax receipts to fulfill the commitment to capital over the last decade. In 1995, the definition of contribution to capital was officially broadened to include the transfer to Bond Retirement Fund. The Authority provided a contribution to capital equivalent to the minimum of 10% in 1998 through 2002. Growth in Authority-wide capital needs progressively increased this ratio between 2003 and 2008, from 11.4% to 14.3%.

In 2009, the contribution to capital increased to 18%, about $10.5 million, however, Sales and Use Tax receipts plummeted, losing 11% of revenue. In 2010, Sales Tax collections increased 5.6%, compared to 2009 and 18.3% of the revenue was transferred to Capital, about $12.5 million. Stimulus funds provided through ARRA grants in 2009 provided almost a year’s funding amount for shovel-ready projects. The Authority was able to utilize those funds effectively and catch up on needed infrastructure work. Capital requirements for 2010 and 2011 were reduced from the 2008-2009 levels. Unfortunately, our plan must be maintained at that level in 2012 through 2016 in order to keep our operating and capital budgets in balance. If current Sales Tax revenue will not support past levels of service, it also will not support past levels of capital expenditures.

Policy Statement: Capital Improvement Funds shall be used to account for the construction and acquisition of major capital facilities and equipment.

Rationale: The separation of funds used for day-to-day operations from those employed for capital improvements facilitates the planning process and the management of resources.

Implementation: Capital investments are defined as those exceeding $5,000, where the useful life of the asset exceeds one year. The Capital Improvement Fund includes the RTA Capital Fund and the RTA Development Fund. The Capital Improvement Fund is supported by the Federal and State grants as well as local sources.
2012 Budget Guide

Policy Statement: The percent of capital maintenance to capital expansion outlay will be a minimum of 75% and a maximum of 90%.

Rationale: Transit remains a capital-intensive business and continued quality service relies solidly on maintenance of infrastructure and equipment. Investments must anticipate future service requirements and capacity. Ridership is increased only through a clean, dependable, and well-operated system.

Implementation: Recognizing that the capital program requires a critical balance between maintenance of existing assets and expansion efforts, this policy objective has been used in the past to develop the annual capital budget. In 2009, 2010, and 2011, the capital maintenance to expansion ratio is 95.6%, 99.0%, and 96.9%, respectively. During these years, our capital projects are to maintain our existing vehicles, buildings, and infrastructure. A reduced level of Sales Tax means the funds available will be used for maintenance and no funds available for expansion. This is a new reality currently faced. The ratio is estimated at 83.3% in 2012 and at this level will be within goal.

Policy Statement: The Authority will strive to take advantage of all available State and Federal grants and other financing programs for capital improvements, including but not limited to, State of Ohio public transportation grants and Federal Highway Administration programs, as well as the programs of the Federal Transit Administration.

Rationale: Various formula grants are usually allocated to systems based on service or demographic indicators. Discretionary grants are competitive and require the maintenance of positive relationships, solid planning, and well-conceived projects. The Authority strives to maximize grant funding in order to best leverage local funds. Furthermore, as more dollars are needed to support an aggressive Long-Range plan, the Authority will explore and secure other creative and non-traditional revenue sources.

Implementation: Limited availability of funding at the Federal, State, and Local levels meant the Authority could only place emphasis on the most essential and realistic capital projects during the 2012 process. The Authority continues to aggressively pursue the flexible funding authorized under the Safe, Accountable, Flexible, Efficient, Transportation Equity Act: A Legacy for Users (SAFETEA-LU) and continues to improve its internal capability to plan, finance, and implement its Capital Improvement Plan.

The 2012 Budget also reflects the capitalization of traditional maintenance type expenditures allowable at the Federal level, which includes inventory material and supplies and preventable maintenance costs. It also includes funding from the Transportation Review Advisory Committee (TRAC). Long-Range capital planning efforts continue and will shape future capital strategies.
SUPPLEMENTAL PENSION FUND

Policy Statement: Every two years, an evaluation, including appropriate actuarial studies, shall be made of the Supplemental Pension Fund to determine the amounts required to meet expected obligations of the Fund. Any additional funds determined to be needed will be allocated during the annual budgeting process of the Authority.

Rationale: A periodic evaluation of the pension amount ensures that the Authority has adequate funds to meet expected obligations.

Implementation: The Supplemental Pension Fund contains assets held in trust for the payment of pension benefits to certain retired employees of the Authority. Provisions of the plan are delineated in the agreement between RTA and the Amalgamated Transit Union (ATU). Because of low levels of investment income earned over the last few years and increasing expenditures, the fund has required transfers from the General Fund to keep the recommended balance. The transfers from 2008 through 2011 were held at $100,000 per year. In 2012, 2013, and 2014, $100,000 transfers will be needed each year to ensure that the Fund remains at the recommended level to meet all obligations.

INSURANCE FUND

Policy Statement: The Authority is insured through both self-insurance and purchased insurance. Insurance for property and equipment losses as well as liability is to be purchased on the open Insurance market. The Risk Manager determines the basis for the Insurance Fund structure and coverage levels.

Rationale: The Authority desires to save funds by implementing the most appropriate balance of insurance to solve claims. Sufficient resources have been set aside to provide security against normal business risk, for major property claims, and to purchase specified insurance for these purposes.

Implementation: The General and Insurance Funds provide for the payment of the insurance purchased on the open market. Since the hiring of a Risk Manager in 1998, the Insurance Fund was restructured to include a mix of self- and purchased-insurance. This was a major change from the Authority’s previous self-insurance position. In 2012, over $2.9 million is budgeted in the General Fund for the payment of ordinary and routine losses in the form of personal injury and property damage claims. An additional $2.8 million is budgeted in the Insurance Fund for claims outlay and to cover insurance premiums for catastrophic or extraordinary losses.
**2012 Budget Guide**

*Policy Statement:* The minimum balance to be maintained in the Insurance Fund shall be determined by the Risk Manager on an annual basis taking into consideration the balance between self-insurance and purchased-insurance requirements. Upon attaining the required minimum balance, additional funds will be allotted to the Insurance Fund during the annual budgeting process based on the results of periodic actuarial studies of the Fund to assess its sufficiency.

*Rationale:* The intent is to ensure that reserves and insurance levels are sufficient to cover extraordinary or catastrophic losses. The periodic evaluations will determine the sufficiency of the Fund and the cost-effectiveness of maintaining a self-insurance program versus obtaining coverage externally or a combination of the two.

*Implementation:* Ordinary and routine losses are paid through the Risk Management Department's General Fund Budget. Approximately $3.5 million, $3.2 million, and $3.3 were transferred to the Insurance Fund in 2009, 2010, and 2011, respectively. For 2012, the transfer has been reduced to $2.7 million.

A $2.9 million transfer from the General Fund is projected in 2013 to maintain the Fund at its minimum balance of $5.0 million. In 2014, a projected transfer of $3.1 million will be needed to maintain the minimum balance.

---

**BOND RETIREMENT FUND**

*Policy Statement:* Principal and interest payments on outstanding bonds will be accounted for in the Bond Retirement Fund. Debt issuances shall comply with pertinent State and Federal laws, finance only long-term capital assets, and supported by adequate debt servicing capacity.

*Rationale:* It is the intent of the Authority to issue debt in a manner that adheres to State and Federal laws and prudent financial management principles.

*Implementation:* Historically, the Authority has used debt capacity sparingly due to the benefits of Federal and State grant funding. Reductions in these sources of capital support over the years in combination with an aggressive long-range Capital Improvement Program (CIP), has resulted in more frequent use of debt sales as a revenue source for the Authority's capital needs. At the end of 2011, the outstanding debt for the Authority totaled $142.1 million in general obligation (GO) bonds, requiring principal and interest payments of nearly $18.9 million in 2012. Principal and interest payments are expected to continue to increase in future years due to the on-going needs of the Capital Improvement Plan.
Debt Financing

Ohio law permits the Authority to issue both voted and unvoted debt and to levy ad valorem property taxes. Current obligations have not required the use of property taxes for debt service. Debt issuances are subject to three limitations as specified in the Ohio Revised Code and the Ohio Constitution:

1. **Restriction:** Total debt supported by voted and/or unvoted property taxes may not exceed 5 percent of the total assessed valuation of the property within the Authority’s territory (Cuyahoga County).

   **Impact:** The provision is not currently applicable since debt obligations have not required the use of ad valorem property taxes for debt service payments. Further, the $1.49 billion limitation (based on the county’s assessed valuation of $29.8 billion) is not overly restrictive in view of the Authority’s debt requirements.

2. **Restriction:** Annual principal and interest payments on all unvoted general obligation (GO) bonds may not exceed one-tenth of one percent of the total assessed valuation.

   **Impact:** The 2008-2010 recession has negatively affected the property valuation for Cuyahoga County leading to a decline from $32.5 billion to $29.8 billion. Based on this valuation, the annual debt service capacity of one-tenth of one percent would be $29.8 million and apply to all debt issued by the Authority.

3. **Restriction:** The total amount of annual debt service on unvoted general obligation (GO) bonds issued by overlapping subdivisions is limited to ten mills of assessed valuation. Overlapping subdivisions, include Cuyahoga County and various municipalities, school districts, and townships within the taxing district.

   **Impact:** The ten-mill limit provision pertains to all unvoted debt regardless of the source of payment and historically has been the most restrictive to the Authority. At the end of 2011, this restriction remains above the 10-mill limitation with 10.6 mills in use, primarily due to the decrease in property valuation, leaving 0.00 mills for additional debt issuances. The fact that the 10-mill limit has been exceeded is now another factor to be considered as the Authority prepares for an additional debt issuance in FY2012.

Beyond that, it should be noted that in 1996, the Authority’s bond rating, a major determinant of the interest rate charged on notes and bonds, was upgraded by Fitch Investors Service from A- to A. The Authority issued debt in 2008, and refinanced debt at a lower interest rate. The Authority did not issue debt in 2009, 2010, or 2011. Fitch Investors Service currently holds the A+ rating for GCRTA and Moody’s is at Aa3.
Introduction

As the Authority’s finances become tighter, increased emphasis has been placed on the budget management process. The following procedures were instituted to strengthen this process:

- The Board of Trustees (BOT) developed a set of financial policies to guide the development of the budget plan and articulate the Authority’s operating guidelines.
- The Authority’s performance is measured against the standards established by the BOT.
- A formal budget document is produced, providing clear, timely, and accurate budget information to officials and the public.
- The expenditures are tracked against appropriations and available resources.
- Performance indicators are used to assess the containment of costs and the effectiveness of service delivery.
- The Citizen’s Advisory Board (CAB) meets monthly to provide the pulse of the community in matters of fare changes, Long Range Plan updates, capital projects, and service changes.

The Budget Cycle

For the Authority, the fiscal and calendar year coincide. The budget process for the forthcoming fiscal year begins in June with the development of the Tax Budget. The Authority prepares a Tax Budget as a valuable tool for estimating budget year resources and performing appropriations planning.

Around the same time, a mid-year review of spending patterns and budget variances is conducted. The July review and the Tax Budget are essential components of the base level appropriations assumed for the succeeding budget cycle. The development of this base budget begins the annual budget process, which proceeds as follows:

- A budget basis (or starting point) is selected, usually based on the mid-year estimate or the original appropriation level.
- The Office of Management and Budget (OMB) staff adjusts the budget basis for any nonrecurring costs, contracts, or binding commitments, or inflation. The product is called the Base Budget.
- After receiving the Base Budget, departments submit their requests for adjustments.
- Negotiations between OMB staff and the department staff refine the Base Budget.
- When completed, the Base Budget includes commitments, recurring costs, and any approved new projects and initiatives.
2012 Budget Guide

- The finalized CEO/General Manager's Recommended Budget:
  - Is the sum of the refined Base Budgets and Adjustments
  - Is limited to estimated available resources
  - Satisfies the Authority's financial policies to the best extent possible
  - Supports the Authority's mission and strategic direction as embodied in the Board Policy Goals and outlined in the Strategic Planning Process

- The CEO/General Manager's Recommended Budget is presented to the Executive Management Team (EMT) in October.

- The CEO/General Manager's Recommended Budget is presented to the Board of Trustees (BOT) in November and December and is made available to the public.

- At least one budget hearing in December is scheduled for the BOT and the general public, which includes public discussion of the budget.

- The review process culminates in the formal adoption of a budget resolution at the December Board Meeting. It is the Trustees' practice to finalize appropriations before the new fiscal year begins.
Management Policies

The Authority continues to operate under the Quality Management System (QMS) through the TransitStat program. The Board of Trustees (BOT) and the Executive Management Team (EMT) have identified a Mission Statement and five Priority Policy Goals essential for growth and progress in RTA. These are reviewed annually and modified if necessary. Budget decisions are made with the overall strategic planning process in mind.

For 2012, these Management Policy Goals remain:

- **Customer Focus**: Provide safe, high quality service to all customers and support our employees in that endeavor.
- **Improve Financial Health**: Improve the Authority’s financial health through efficient use of resources and the pursuit of new and innovative revenue sources.
- **Prepare for the Future**: Prepare for the future by forging new partnerships and strengthening existing ones with public and private sectors and establish policies, funding, innovations, and technologies that support cost-effective public transportation.
- **Provide Community Benefits**: Provide social, economic, and environmental benefits to the community through system improvements and increase community awareness of these contributions.
- **Expand and Reorganize Service**: Expand and reorganize service to retain our current riders and attract new riders by providing service that meets customer and community needs.

During the development of the 2012 Budget, as in recent years, emphasis is placed on two of the Board Policy Goals: Customer Focus and Improve Financial Health.

**Budget Monitoring and Control**

A quarterly financial report allows the CEO/General Manager and the Board of Trustees (BOT) to monitor actual performance. This report is used to determine adjustments to the budget. The budget may be adjusted after periodic reviews, but is normally limited to interdepartmental transfers rather than an increase to the overall appropriation level. The CEO/General Manager has the authority to transfer appropriations within departments, which are reported to the Trustees within 30 days. Any increase to the Authority’s total operating budget requires BOT approval.

The CEO/General Manager also has the authority to upgrade or reclassify staff positions. Positions may be reallocated between departments and divisions, providing the overall division staffing level remains at the level approved by the BOT. This allows the CEO/General Manager flexibility in making staff decisions.
Service Profile

Economic Profile

(U.S. Census Bureau)

The Service Profile depicts the economic and service activity as it impacts the organization on operational and financial levels. The provided information highlights trends regarding items that have direct affect on how RTA develops, supports, and implements services to the Cuyahoga County area.

Service Profile

Trends of North East Ohio compared to the State and National Averages

The Population in Cleveland has been steadily decreasing since the 1980s and Cuyahoga County has been decreasing since 2000. The economic crisis in 2008 and 2009 hit Cuyahoga County, City of Cleveland, and North East Ohio hard. The unemployment rate was already higher than the national average at this point in time. Unemployment remains high in Ohio and the City of Cleveland. Unemployment in Cuyahoga County has recently reduced lower than the national average.

Within the region, however, there has been considerable shifting of the population. Here are how the counties have changed since 2000.

- Ashtabula County - 101,497, down 1.2 percent from 102,728
- Cuyahoga County - 1,280,122, down 8.2 percent from 1,393,979.
- Geauga County - 93,389, up 2.7 percent from 91,753.
- Lake County - 230,041, up 1.1 percent from 227,511.
- Lorain County - 301,356, up 5.9 percent from 284,664.
- Medina County - 172,332, up 14.1 percent from 151,095.
- Portage County - 161,419, up 6.2 percent from 152,061.
- Summit County - 541,781, down 0.2 percent from 542,899.

Transit Service Profile

National Transit Trends

A total of 611 Agencies reported data in the National Transit Database (NTD) in 2010. The National Transit Database was established by Congress to be the Nation's primary source of information and statistics on the transit system of the United States. Recipients of grants from the Federal Transit Administration (FTA) are required by statute to submit data to the NTD. Over 660 transit providers in urbanized areas currently report to the NTD through the internet-based reporting system. The NTD is used to help meet the needs of individual public transportation systems, the US Government, State, and Local governments, and the public for information on which to base public transportation service planning. (www.ntdprogram.gov/ntdprogram/)

*HR = Heavy Rail; LR = Light Rail; DR = Demand Response; TB = Trolley Bus*
Glossary

**Accrual Accounting** î A method of financial accounting where revenues are recorded when earned, however, the revenue does not have to be received in the same reporting period. Similarly, expenditures are recorded as soon as the goods or services are received; the payment of the expenditure does not have to be made in the same reporting period.

**Ad Valorem Tax** î A tax based on the value (or assessed value) of property.

**Amalgamated Transit Union (ATU)** î The largest transit union in North America.

**Americans with Disabilities Act (ADA)** î of 1990, requires that public entities, which operate non-commuter fixed route transportation services, also provide complementary Paratransit service for individuals unable to use the fixed route system.

**Appropriation** î A financial authorization granted by the Board of Trustees to cover expenditures and incur obligations.

**Arbitrage** î Investment earnings representing the difference between interest paid on bonds and the interest earned on the investments made utilizing bond proceeds.

**Assessed Valuation** î The value of property against which an ad valorem tax is levied. Valuations are conducted by the County Auditor and reflect a percentage of the true or market value of the property.

**Asset Maintenance** î This category of capital projects refers to projects where 100% of the funding is provided by local sources (versus grant funded sources) and represents expenses incurred to maintain or improve the Authority’s assets.

**Balanced Budget** î The Authority considers the budget balanced when total expenditures equal total revenues. The budget is also balanced in situations where total expenditures are less than total revenues, which is called a surplus. There are also few instances where the Authority might plan to spend fund balances from previous years on one-time or non-routine expenditures, provided the funding from previous years is available. The Authority, however, must have a plan in place to not build ongoing expenditures into this type of funding.

**Base Budget** î The total appropriation for maintaining the Authority’s daily operations, authorized by the Board of Trustees.

**Bond** î The written evidence of the debt issued by the Authority. It bears a stated rate of interest and maturity date on which a fixed sum of money plus interest is payable to the holder.

**Bond Counsel** î A lawyer or law firm, which delivers an opinion regarding the legality of a debt issuance or other matters.

**Budget Basis** î The starting point for budget deliberations, usually the current budget year appropriation, or the Midyear Review estimate of expenses.

**Budget Deficit** î Usually, this is a projection of expenditures exceeding appropriations. It is normally determined during a quarterly review. The budget is controlled so that expenditures plus encumbrances should not exceed appropriations.

**Bus Rapid Transit (BRT)** î A broad term given to transit systems that use buses to provide a service that is of a higher quality than an ordinary bus line. See HealthLine.

Capital Improvement Budget — The current year estimated revenues and expenses of construction projects and capital equipment purchases in the Capital Improvement Plan. The Capital Budget includes maintenance and expansion projects that are funded through grants and local sources.

Capital Improvement Plan (CIP) — A five to ten year plan for constructing, acquiring, or maintaining capital assets.

Cash Accounting — A major accounting method that recognizes revenues and expenses at the time physical cash is actually received or paid out.

Cash Deficit — Occurs when a fund is carrying a negative cash balance. This situation typically requires a cash transfer to remedy.

Closed Circuit TV (CCTV) — Video cameras transmit a signal to a specific or limited set of monitors. CCTV is used for surveillance in areas that need security, such as rapid stations, transit facilities, Park-N-Rides, and the airport.

Comprehensive Annual Financial Report — See CAFR

Computer Integrated Transit Maintenance Environment (CITME) — A computer program, created by UltraMain, purchased to assist in modernizing maintenance and inventory operations through management by data.

Controlled-Access Right-of-Way (ROW) — Lanes restricted for a portion of the day for use by transit vehicles and other high occupancy vehicles (HOV).

Cost Ceiling — A limit on the reimbursed costs for federally supported capital projects.

Debt Limit — A statutory or constitutional limit on the principal amount of debt that an issuer may incur or have outstanding at one time.

Debt Service — Principal and interest paid on bonds and notes.

Debt Service Coverage — The measure of the Authority’s ability to meet annual interest and principal payments on outstanding debts.

Decision Issue — A budget request for new or increased funding of projects or programs, which exceeds base budget requests. Use of decision issues aids the process of allocating financial resources and provides for the comparison and prioritization of existing programs and services relative to the need for new programs and services.

Depreciation — The reduction in value of a capital asset due to use, age, or wear.

Disadvantaged Business Enterprise (DBE) — A program intended to ensure nondiscrimination in the award and administration of the Authority’s programs and contracts.
**Glossary**

**Door-to-Door Service** ô Paratransit Service where drivers have been instructed to pick-up and drop-off passengers at the front door of places of residence, at the front door of the apartment buildings in which they live, or front door of destination.

**Encumbrances** ô A budgetary technique for recording unperformed contracts for goods and services. Use of encumbrances restricts the balance in each fund so that total commitments (expenditures plus encumbrances) will not exceed appropriations.

**Exclusive Right-of-Way (ROW)** ô Roadway or other right-of-way (ROW) lanes reserved at all times for transit use and / or other high occupancy vehicles (HOV).

**Executive Management Team (EMT)** ô The General Manager’s first level of management, which includes Deputy General Managers and Executive Directors.

**Expenditure** ô An expense that a business incurs as a result of performing its normal business operations.

**Family and Medical Leave Act (FMLA)** ô To grant employees temporary medical leave under certain circumstances.

**Federal Highway Administration (FHA)** ô Supports all of America’s roads and highways and ensures them to be the safest and most technologically up-to-date. Although State, local, and tribal governments own most of the Nation’s highways, the FHA provides financial and technical support to them for constructing, improving, and preserving America’s highway system.

**Federal Transit Administration (FTA)** ô Supports a variety of locally planned, constructed, and operated public transportation systems throughout the U.S., including buses, subways, light rail, commuter rail, streetcars, monorail, passenger ferry boats, inclined railways, and people movers.

**Financial Management System (FMS)** ô The information system software that houses all financial data and includes the General Ledger, Procurement, and Budget Modules.

**Fiscal Year** ô The 12-month period that the Authority uses for accounting purposes. The Fiscal Year for the Authority is concurrent with the Calendar Year.

**Fixed Guideway (FG)** ô A separate right-of-way (ROW) for the exclusive use of public transportation vehicles. The Heavy Rail and Light Rail modes operate exclusively on fixed guideway (FG).

**Fraternal Order of Police (FOP)** ô The world's largest organization of sworn law enforcement officers, committed to improving the working conditions of law enforcement officers and the safety of those we serve through education, legislation, information, community involvement, and employee representation.

**Full-Time Equivalent (FTE) Position** ô A part-time position converted to the decimal equivalent of a full-time position based on 2,080 hours per year for 40 hours per week employees.
Glossary

**Fund** ï A reserve of money set-aside for a specific purpose. The RTA has specific funds set up for Operating (General), Capital, Insurance, Bonds, Pension, and Law Enforcement. There are also reserve funds in place for diesel fuel, compensated absences, hospitalization, and the lightning strike at Brookpark Substation.

**Fund Deficit** ï An excess of expenditures over revenues during a fiscal year. This is not an acceptable condition and must be addressed by transferring revenue to the fund in deficit. See Balanced Budget.

**Fund Type** ï See Fund.

**GAAP** ï Generally Accepted Accounting Principles. These principles are guidelines and rules for use by accountants in preparing financial statements.

**General Obligation (GO) Bond** ï A bond that is secured by the full faith and credit of the Authority. The GCRTA pledges to utilize its taxing power (almost always Sales Tax proceeds) to pay debt service.

**Goal** ï A statement of direction, purpose, or intent based on the needs of the community. A goal is not concerned with a specific achievement in a given time period.

**Guideway** ï A separate right-of-way (ROW) or rail system for the exclusive use of public transportation including the buildings and structures dedicated for the operation of transit vehicles. Includes tunnels, subways, bridges, tracks, and power systems.

**HealthLine** ï A route providing service along Euclid Avenue that is of a higher quality than an ordinary bus line. This service improves transit, as well as supports increased development along Euclid Avenue with links to medical, educational, and cultural centers in Greater Cleveland.

**Heavy Rail Vehicle (HRV)** ï Operate on the Red Line, from the Airport to Windermere Rapid Station. Heavy Rail is a transit mode that is an electric railway with the capacity for a heavy volume of traffic.

**Indirect Costs** ï The expenses of doing business that are not readily identified with the Authority’s transportation, but rather with the general operation of the organization, such as finance, accounting, engineering, legal, and human resources.

**Interactive Voice Response (IVR)** ï A phone technology that allows a computer to detect voice and touch tones using a normal phone call. The IVR system can respond with pre-recorded or dynamically generated audio to further direct callers on how to proceed.

**Interest** ï The amount paid for the use of money.

**Interest Expense** ï The charges for the use of borrowed capital incurred by the transit agency, including Interest on long term and short-term debt obligations.

Glossary

Key Transit 2025 — The long-range plan to help guide the future development of public transit in Cuyahoga County, which focuses on bringing RTA's transit infrastructure up to higher standards and encouraging transit-oriented design, or TOD. Related to nationwide efforts towards Smart Growth, TOD encourages locating transit and development in close proximity in order to reduce auto dependency and improve transit access.

Legal Millage Rate — The stated rate, in mills, for levying real and personal property taxes.

Light Rail Vehicle (LRV) — Operate on the Blue, Green, and Waterfront Lines. Light Rail is a transit mode that typically is an electric railway with a light volume traffic capacity, compared to Heavy Rail (HR).

Market Value — The County Auditor’s estimate of the true or fair value of real or personal property. In accounting, it is the price that a good or service would command on the open market.

Mill — The equivalent of $1 of tax for each $1,000 of assessed value of real or personal property.

Mixed Traffic Right-of-Way (ROW) — Roadways that have no time restrictions nor restrictions on what type of vehicles may use them.

Mode — A general term for the different kinds of transportation used to transport people.

NOACA — Northeast Ohio Areawide Coordinating Agency. It is the federally designated Metropolitan Planning Organization (MPO) for five counties of Northeast Ohio, which include Greater Cleveland and the Lorain area. Its chief functions are to perform long- and short-range transportation planning, transportation-related air quality planning, and areawide water quality management planning, as defined by federal and Ohio mandates.

Notes — Short-term promises to pay specified amounts of money, secured by specific sources of future revenue.

Revenue — The amount of money that a company actually receives during a specific period, usually a year.

Object — A commodity-based expenditure classification which describes articles purchased or services obtained. It represents the lowest degree of expenditure summary and budgetary control.

Objective — Desired output-oriented accomplishments, which can be measured and achieved within a given time frame.

Office of Business Development (OBD) — Engage, support, and assist the local disadvantaged business community to help ensure fair and representative participation in procurement opportunities at RTA and within the community at-large. The primary function of the Office of Business Development (OBD) is to administer RTA’s Disadvantaged Business Enterprise (DBE) Program.

Official Statement — A document prepared by the Authority when issuing debt that gives financial and statistical information to potential investors and others.
Glossary

**Ohio Depository Act** Requires a written investment policy that is approved by the treasurer of a political subdivision or governing board, or by the investing authority of a county, to be on file with the State Auditor. The policy must provide that all entities conducting investment business with a subdivision treasurer or governing board or county investment authority sign the investment policy of that subdivision or county.

**ODOT** Ohio Department of Transportation. State operating and capital subsidies are distributed to the Authority by ODOT.

**Operating Budget** Current year estimated revenues and expenses that provide for the day-to-day operations of the Authority.

**Operating Deficit** The sum of all operating revenues minus operating expenses. See Balanced Budget.

**Operating Ratio** A ratio that shows the efficiency of management by comparing operating expenses to fare revenues.

**Operating Reserve** The available ending balance. A reserve is maintained as a safeguard to protect the organization in times of cyclical economic downturns and will be replenished as the economy improves. The Board Policy requires at least one month’s operating reserve. RTA recently added three reserves for fuel, medical, and compensated absences.

**Outlays** The payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

**Park-N-Ride** Parking lots owned by the GCRTA to provide rail and/or bus services for all major commuter corridors in Cuyahoga County.

**Pass-Thru** A situation where the Authority functions as a channel for the expenditure of funds from another source without authorization to decide the use of the funds.

**Principal** The face amount of a bond, which the issuer promises to pay at maturity.

**Program** A group of related activities performed by one or more organizational units for the purpose of accomplishing an objective.

**Ratings** Designations used by ratings services to indicate the financial health of the issuers of debt.

**Repurchase Agreement** A money market transaction in which one party sells securities to another while agreeing to repurchase those securities at a later date.

**Resolution** A legal and public declaration by the Board of Trustees of intent, policy, or authorization. Resolutions are the legislation of the Authority.

**Resolution Category** One of two cost categories at which the Board of Trustees controls operating budget expenditures. These include Personnel Services and Other Expenditures.

**Revenue Bond** A bond on which the debt service is payable solely from the revenue generated from the operation of the project being financed.
Routine Capital — Budgeted expenses for equipment, where the useful life of which is a year or more and the unit cost is at least $1,000. These expenses are locally, not grant, funded.

Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) — A legislative authorization for transit approved in 2005. It is a six-year initiative, which replaces the expired Transportation Equity Act for the Twenty-First Century (TEA-21).

Senior Transportation Connection (STC) — Of Cuyahoga County is designed to be the centralized coordinating unit for senior transportation services in Cuyahoga County. The STC's mission is to provide comprehensive, efficient, and affordable transportation for senior adults in the county.

Service Indicator — An output measure showing a statistical workload change or the degree to which program objectives are achieved.

State Infrastructure Bank (SIB) — A funding initiative administered by the State of Ohio, Department of Transportation. The SIB provides low-cost loans for transportation infrastructure projects.

Temporary Assistance for Needy Families (TANF) — Provides grants to states to fund a wide array of benefits and services, primarily to low-income families with children. It is best known for funding cash welfare benefits to needy families with children, but it also is used to fund transportation aid and assistance.

Tax Levy — The total amount to be raised by general property taxes for purposes specified in the Tax Budget.

Threat and Vulnerability Assessment (TVA) — Analyzes all the aspects of security: physical, personnel, information, and communication. It measures the current threat capabilities against emplaced security measures and operating procedures to identify vulnerabilities.

TransitStat — The Greater Cleveland Regional Transit Authority's performance monitoring program. It entails frequent gathering, reviewing, analyzing, and monitoring of critical success measures.

Transportation Equity Act for the Twenty-First Century (TEA-21) — A legislative authorization for transit originally approved in mid-1998. It is a five-year initiative, which originally expired in 2003, but was extended by Congress pending an agreement on new transit legislation. It expired in 2005.

Transportation Improvement Plan (TIP) — The official listing of highway, transit, bikeway, airport, and harbor projects covering a five-year period.

Transportation Review Advisory Council (TRAC) — Created by the Ohio General Assembly in 1997 to bring an open, fair, numbers-driven system to choosing major new transportation projects.

U-Pass (Universal Pass) — Offers university students a discounted transportation pass. Currently students at Case Western Reserve University (CWRU), Cleveland State University (CSU), Cleveland Institute of Art, and Cleveland Institute of Music have U-Passes.
Glossary

**Urban Mass Transportation Act (UMTA) of 1964**  As amended, an Act of Congress providing funds to the Authority under various programs:

**Section 5309 (formerly Section 3)**  A Federal discretionary program directed primarily to those rail modernization and major bus projects that require funding beyond that available under Section 9.

**Section 5307 (formerly Section 9)**  A Federal formula program which makes resources available to urbanized areas for planning, capital, and operating assistance purposes. Funding allocations are earmarked by Congress.

**Title 23 Interstate Transfer Fund**  Federal funding which had been made available for alternative projects due to the elimination of Interstate 490 from the Federal Interstate Highway Program. Funding for this program was split between highway and transit projects. Also established by Section 134, Title 23 of the United States Code. All funds have been exhausted at this time.
